

Gentle Accumulation-Feeder

Gently accumulate round parts and packages Supplies parts "on demand". Use as surge buffer for flexible automation, packaging or machining cell. This application shows fragile parts being

FEATURES :

- Gentle Accumulation
- May include zero back pressure zones
- Scalable to Part Dimensions & Weight
- On Demand Function
- No moving parts, low maintenance
- Adjustable tooling to create single file discharge
- May including singulation escapements

BENEFITS:

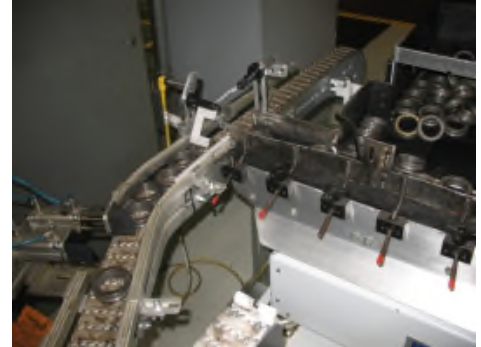

- Gentle buffer storage and feeding of simple parts
- Often adjustable to accommodate a range of part or packages.
- Can be zoned to minimize back pressure and part to part interactions.
- Low Maintenance with simple cleaning & replacement reducing maintenance costs

Uses simple tooling allowing for parts or packages to exit the accumulation table in single file. It is adjustable to allow the table to feed families of parts.

Accumulator-Feeder

Accumulation technology with no moving parts. Proven reliable ,gentle, scalable part accumulation

Accumulator-Feeder can incorporate various Layouts and discharge points. Escapements and metering devices configured to meet your requirements

Zoned Accumulator-Feeder-Designed to minimize part to part interactions.

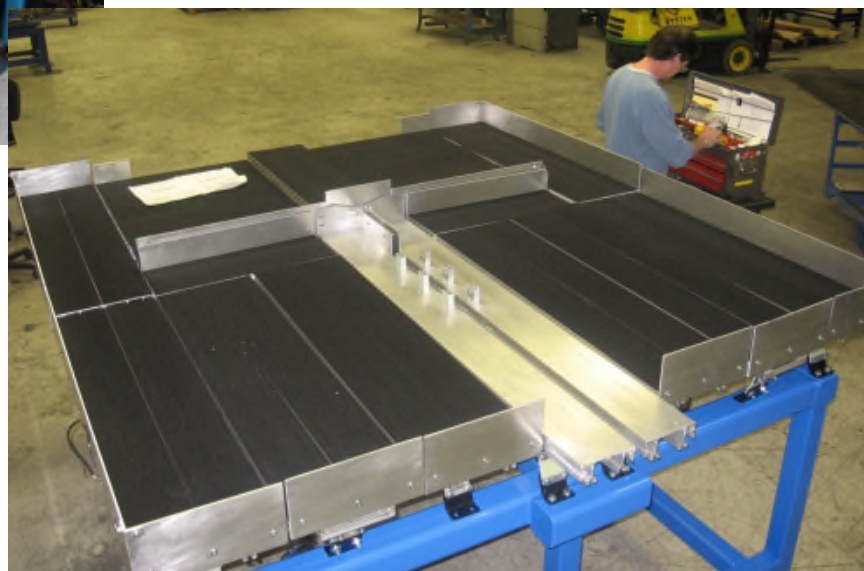

High Capacity

FIFO Configuration

Singulation Escapement

Scalable
